EDUCATION

National University of Singapore | Singapore [Aug 2023 – Apr 2027]
Bachelor of Computing, Computer Science

- Specialization in AI/ML , Parallel Computing, Database Systems
- NUS Fintech Society – Full-Stack Software Engineer (2023-2024)
- RH Developers – Vice-Head (2024-2025), Backend Engineer (2023-2024)

WORK EXPERIENCE

LiveX AI *Machine Learning Engineer* | San Francisco Bay Area [Jan 2026 – Present]

- End-to-end **Machine Learning** pipelines, specializing in multimodal generative AI and computer vision models.
- Dataset curation (experience with **Google Cloud CLI**), evaluating SOTA model architectures: 3D Gaussian Splatting, Diffusion Transformers, etc.

NUS *Research Intern* [Oct 2025 – Present]

- Still working on publication, under Prof. Qiao DanDan. Deep research into hierarchical diffusion models, genetic algorithms and their uses in adaptive multi-agent collaboration systems.

CapitaLand Development *Software/AI Engineer* [Aug 2025 – Nov 2025]

- Designing end-to-end **contextualized late interaction** over vision transformers, with ColPali-style scoring to enable patch-level multimodal retrieval
- Integrating the pipeline with multiple **Azure** services to build an **agentic** enterprise-safe retrieval system and RAG chatbot for domain users

Accenture *Full Stack Developer Intern* [May 2025 – Aug 2025]

- Part of the Accenture development team migrating the business and partnership section of the legacy monolith to **Angular** micro-frontends, for the IRAS Tax Portal (Inland Revenue Authority of Singapore)
- Spearheaded integration of a global change detection system and gained deep expertise in **Angular**, **RxJS**, **NgRx** & **TypeScript** contributing scalable, generic reactive state management patterns
- Collaborate closely with **business analysts** and **end-users** within an agile workflow. Take part in daily stand-ups, present demos and gather real-time feedback to iteratively improve the application. Shipped 0 bugs to production.

PROJECTS

Wally AI, *Personalized Relationship Wellness Assistant* [Jan 2025 – Present]
https://wally-sandy.vercel.app/

- Wally is a relationship wellness chatbot that relates to Singlish & Chinese users. Wally is a full-stack app of mine, that is built using **Next.js** App Router**, tRPC**, **Prisma** ORM, **NextAuth**, **Vercel**, **Pinecone** DB & more
- Developed a fine-tuned **OpenAI** & **Deepseek** LLM integration for Wally, that processes text and screenshot inputs to deliver semantically relevant responses based on chat and profile context
- Currently in market validation and beta testing with a small group of private users

Monday, *Personal Butler iOS App* [May 2025 – Present]
https://github.com/farhan-navas/monday

- Build a **SiriKit** personal assistant (written in **SwiftUI** and **Flutter**) to deliver morning briefings when I wake up.
- Architect an offline-first **CoreData** store to keep all user data local and integrate with **Apple Intelligence**.
- Built an app-blocking feature using Apple's **Screen Time** frameworks so that I can block distracting apps on by time of day or based on a certain app time limits, that can be customized.

SKILLS

- **Programming Languages:** JavaScript/TypeScript, C++, Python, Java, Dart
- **Web/Mobile Development:** Next.js, React, Angular, Flutter
- **Tools & Technologies:** Git, Docker, Azure, Linux/Unix, CUDA, OpenMP
- **Database:** PostgreSQL, MongoDB
